# **HPC-LABWORK 0**

---

TRAN Quy Ban  
Department of Information Technology

## **Compilation**

1. Fork the repository from <https://github.com/SonTG/advancedhpc2020.git>
2. Make a folder advancedhpc2020 to contain the data
3. Copy the folder from localdisk into server ictlab2 (Using WinSCP and Putty on Windows)
4. Make a build folder and run the make command
5. Run the command `nvidia-smi` to echeck GPU
6. Run `./labwork`

## **Result**
